GEMS (Girls in Engineering Math & Science) is a not-for-profit program for girls ages 8 to 12. The goal is to enlighten and inspire young minds in the world of science, math and engineering. The program specializes in providing young females with the opportunity to participate in an innovative and enriching camp experience. At GEMS, the belief is that promoting science, math and engineering to girls at an early age will develop a desire for learning and discovery among them.

Hosted at the **Bruce Power** Visitor's Centre

\$125 for the week.
